

# BB274-FISUV-GRL and BB274-FISUV-DLIT3

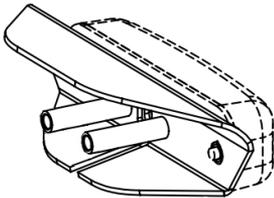

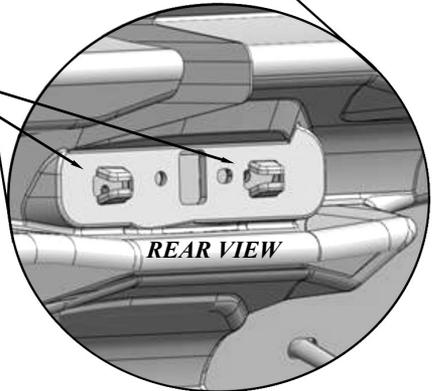

## VersaStar and DLIT3 Grill Brackets for 2015+ Ford Interceptor SUV

1. Gain access to the rear of the grill by removing it. Refer to the manufacturer's Sedan and Utility Police Interceptor Modifier's Guide (or other upfitter's guide) for details on doing this.

REAR VIEW OF GRILL

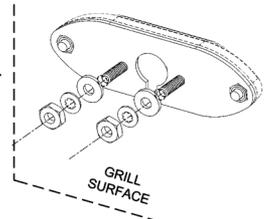

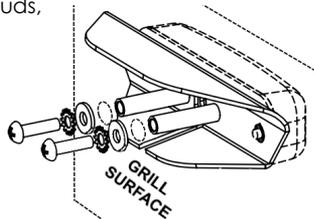

2. Remove both grill inserts by carefully pinching the two clips that secure each of them.
3. Mount your light to the BB274-FISUV bracket following the mounting instructions enclosed with the light.
4. **BB274-FISUV-GRL Only:** Attach two threaded spacers to each bracket.

*Please note that for the BB274-FISUV-GRL, the two brackets differ slightly. The driver side bracket is labeled with a "D" and the passenger side bracket has a "P".*

5. Insert the Bracket assembly w/light into the appropriate slot in the front of the grill. Secure it on the backside of the grill with a flat washer, tooth washer, using the screws or threaded studs, as shown to the right.
6. Refer to the instructions that came with the light to make your wiring connections.
