

BB274-FISUV-VER

2012-2016 Ford Interceptor Integrated DLX3/4/6 Versa Star® Headlight Bracket

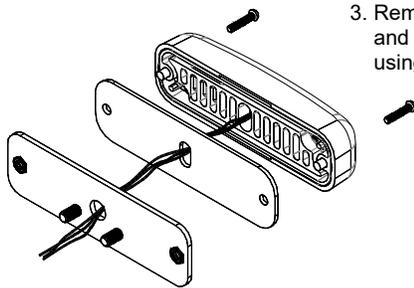

The BB274-FISUV-VER is designed to enable the simple installation of a DLX3/4/6F Versa Star® light inside of the headlight assembly of a Ford Interceptor SUV.

1. Remove the headlight assembly in the manner recommended by the manufacturer.

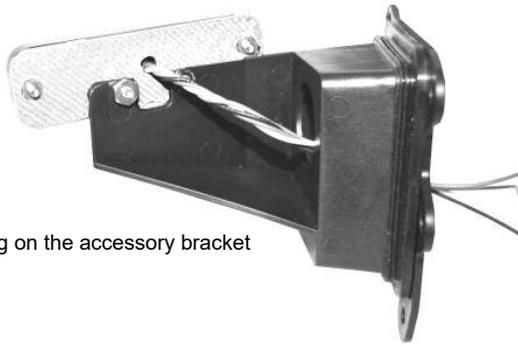

2. Locate and remove the pre-installed accessory bracket in the headlight assembly.

3. Remove the outer housing of the Versa Star[®] light and attach the light to the BB274-FISUV-VER bracket using the screws that came with the light.

CAUTION: Take extreme caution not to over tighten the screws!!! Over tightening of the screws can strip the holes and result in a faulty mount.

4. Attach the bracket/light assembly to the accessory bracket using the flat washer, tooth washer, and nut as shown at the top of the previous page.

5. Poke a small hole in the rubber plug on the accessory bracket and route the wires through it.

6. Re-install the outer housing of the Versa Star[®] light.

7. Install the accessory bracket into the headlight assembly using the original screws.

8. Re-assemble the headlight housing onto the vehicle.

9. Make your electrical connections according to the instructions enclosed with the light.
