

# STAR HEADLIGHT & LANTERN CO.

**BKSWH-361 FORD HARNESSES**

## Specifications and Features

This harness is designed to allow the connection of your Star Constellation® series lights directly to the optional Ford installed Police Package wiring harness. These harnesses are designed to plug right into the 4 pin connectors that are factory installed under the vehicle hood when wiring package 60A or 67U is ordered from Ford. This avoids having to run wires through the fire wall. Each adaptor services one side of the vehicle. You may purchase two 1 output adaptors BKSWH-361-21FD to run one light on either side of the car, or two splitters BKSWH-361-FD-S to run two lights on either side of the car. See below diagram showing how a typical system is installed.
